VERSATILE ALL-IN-ONE SOLUTION

The ThinkCentre Tiny-in-One 23 offers a clean, clutter-free, compact solution with simple setup for mass deployment. The 23" monitor, compatible with all current generation Tiny products, offers outstanding configurability and the modular all-in-one experience means you can update your PC and monitor separately—a great cost-saving measure for large enterprise.

Tiny Modular All-in-One

Tiny was the first 1L desktop in the industry. Now we've improved upon the compact design to create a modular all-in-one desktop PC, with simple setup and enhanced security. Our Tiny-in-One is a 23-inch monitor with built-in housing for both a Tiny system and an external optical disc drive (ODD), which are secured via one single Kensington® lock, and remain secure inside the system even if the cable is cut. Compatible with all current generation models, including:

- M93p Tiny
- M83 Tiny
- M73 Tiny
- M53 Tiny

Reduced Upkeep Costs

With the Tiny-in-One 23, you need only update what you need, when you need to—no worries about replacing the entire system as with traditional all-in-one desktops.

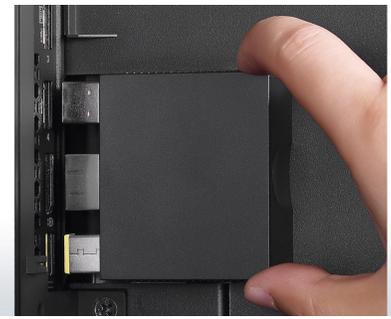

Power On

Tiny-in-One and all current generation Tiny desktops are turned on together when you press Alt + P on your keyboard. Additionally, for M83 and M53 Tiny, they can be powered on by simply pressing the power button positioned on the Tiny-in-One.

Easily Connects to Laptop

The Tiny-in-One easily connects to a laptop, and with the press of a button, you can switch sources between notebook and Tiny. Tiny-in-One also functions as a standalone monitor.

DESCRIPTION	THINKCENTRE TINY-IN-ONE-23
Processor LUT	8-bit / 6-bit
Display	23" Wide LED LCD (1920 x 1080)
